

Coverage Reservation Memo

Claim ID	PROP-B2B-2026-0417
Insured	Nordhafen Precision Parts GmbH
Document type	Coverage / reservation memo
Issued by	Aegis Mutual Industrial SE
Document date	07 June 2026
Loss location	Hafenstrasse 18, Building B, 30179 Hannover, Germany

Purpose and status

This reservation memo records preliminary coverage issues for Aegis Mutual Industrial SE. It is not a final coverage determination. It should be read with the policy wording, adjuster report, lease extract, and expert reports.

Issue	Preliminary position
Insured event	Fire, smoke, and sprinkler water damage appear to be insured perils subject to conditions and exclusions.
Cause	Electrical fault at charging alcove is probable but not proven. Laboratory report pending.
Charging warranty	Possible breach if temporary extension lead supplied overnight charger or combustibles stored within 2 metres.
Landlord property	Building shell repairs are not insured unless tenant has contractual repair liability and policy responds.
BI period	BI cover applies only to interruption caused by insured physical damage, after 48-hour waiting period and subject to mitigation.

Reservation of rights wording extract

Aegis reserves all rights under policy AGI-PR-884219, including but not limited to the battery charging warranty, defective workmanship exclusion, property not insured clause, records condition, policy valuation provisions, deductible, waiting period, and proof-of-loss requirements. Aegis does not waive any policy terms by appointing adjusters, paying emergency mitigation, or requesting documentation.

Documents requested from insured and broker

- Full policy wording and all endorsements, not only schedule extracts.
- Original electrical installation records for charging bench and wall socket B-LB-17.
- CCTV export for 11 May 2026 20:00 through 12 May 2026 04:30.
- Alarm receiving centre logs and sprinkler flow-switch system export.
- Complete stock valuation records, physical count sheets, and salvage bids.
- Customer correspondence supporting rejected goods, delayed orders, penalties, and lost sales.
- Lease, side letters, landlord repair demands, and any waiver-of-recursion or insurance clauses.

Potential subrogation targets

Target	Potential theory	Documents supporting inquiry	Obstacles
HanseLift Service GmbH	Negligent charger service, cable replacement, or inadequate warning.	Service record 04 May; engineer report; witness statement.	Technician warned customer; scope may exclude fixed installation.
Electrical contractor unknown	Faulty or non-compliant socket/charging installation.	Engineer panel observations; lease responsibility extract.	Contractor not yet identified; installation may be old tenant work.
Landlord	Failure to maintain sprinkler or building services.	Lease and sprinkler notes.	Landlord certificate says sprinkler maintained; waiver of recourse may apply.
Insured / no recovery	Internal operational breach of charging warranty and storage practice.	Witnesses, service comments, policy warranty.	Breach must be causally relevant and legally effective.

Recommended claim handling path

- Authorize reasonable emergency mitigation under reservation to prevent deterioration and reduce BI exposure.
- Separate invoices into tenant improvements, insured contents/machinery, stock, BI extra expense, and landlord shell property.
- Commission laboratory examination before disposal or repair of cause items.
- Issue document request with 14-day response target and maintain reserve at EUR 1.725 million pending updated quantum.
- Do not agree to full 56-day BI period until production logs and mitigation evidence are reviewed.

Preliminary conclusion

The file supports continued investigation rather than acceptance or denial. Emergency property mitigation appears payable subject to quantum review. Final coverage may turn on whether a policy charging condition was breached and whether that breach caused or increased the fire loss.
