

## Business Interruption Worksheet

|               |                                                      |
|---------------|------------------------------------------------------|
| Claim ID      | PROP-B2B-2026-0417                                   |
| Insured       | Nordhafen Precision Parts GmbH                       |
| Document type | BI calculation                                       |
| Issued by     | Nordhafen Precision Parts GmbH                       |
| Document date | 03 June 2026                                         |
| Loss location | Hafenstrasse 18, Building B, 30179 Hannover, Germany |

### BI claim position submitted by insured

Nordhafen submitted an initial business interruption worksheet for the period 12 May 2026 to 06 July 2026. The worksheet assumes a 56-day effect period, including complete shutdown of CNC line 2, partial shutdown of packing, and delayed customer acceptance for smoke-exposed goods.

| Metric                                   | Insured value | Source / assumption                                                 |
|------------------------------------------|---------------|---------------------------------------------------------------------|
| Expected turnover during affected period | EUR 1,797,000 | Forecast based on April run-rate plus Volta Pumps May order.        |
| Actual turnover during affected period   | EUR 324,000   | Shipments from unaffected stock and Bremen subcontractor.           |
| Turnover shortfall                       | EUR 1,473,000 | Before trend adjustment.                                            |
| Gross profit rate                        | 38.5 percent  | Management accounts Jan-Apr 2026.                                   |
| Gross profit loss                        | EUR 567,105   | Shortfall multiplied by GP rate.                                    |
| Extra expense claimed                    | EUR 84,600    | Subcontract machining, expedited freight, temporary quality checks. |
| Saved expenses                           | EUR 40,505    | Power, consumables, overtime not incurred.                          |
| Net BI and extra expense claimed         | EUR 611,200   | Before deductible / 48-hour waiting period.                         |

### Customer orders affected

| Customer         | Order / product          | Original ship date | BI note                                                             |
|------------------|--------------------------|--------------------|---------------------------------------------------------------------|
| Volta Pumps AG   | VP-7712 pump housings    | 20 May 2026        | Main delayed order; customer accepted partial shipment from Bremen. |
| RheinValve GmbH  | RV-2409 aluminium blocks | 29 May 2026        | Delayed 9 days; penalty reserve EUR 18,000.                         |
| Nordic Drives AB | ND-88 prototype run      | 04 Jun 2026        | Order rescheduled by customer; causation disputed.                  |
| AeroMet Systems  | AM-120 sensor housings   | 17 Jun 2026        | Transferred to CNC line 1 with overtime.                            |

Adjuster preliminary BI comments

- The worksheet uses a 56-day effect period, but restoration contractor says phased production may resume earlier after air clearance.
- The policy has a 48-hour waiting period. The worksheet does not deduct the waiting period.
- The gross profit rate of 38.5 percent may be overstated because direct freight and temporary subcontract costs are not consistently treated.
- Volta Pumps order drives most claimed loss; customer rejection or acceptance documentation is required.
- Subcontract production in Bremen may reduce lost gross profit but create covered extra expense if economically justified.
- Penalties and customer goodwill credits require policy review; not all consequential losses are automatically BI gross profit.

Documents requested for BI review

| Document                                                     | Purpose                                         |
|--------------------------------------------------------------|-------------------------------------------------|
| Monthly management accounts Jan 2025-May 2026                | Trend and gross profit verification.            |
| Open order book as of 11 May 2026                            | Expected turnover and customer-specific timing. |
| Daily production logs May-July 2026                          | Physical damage link to lost output.            |
| Bremen subcontractor invoices and capacity agreement         | Mitigation and extra expense evaluation.        |
| Customer correspondence on delays, rejections, and penalties | Causation and amount of lost sales.             |
| Payroll and overtime records                                 | Saved expenses and continuing payroll.          |

BI worksheet conclusion

The submitted BI amount is a plausible gross claim presentation but is not adjusted for waiting period, mitigation, trend, saved expenses classification, or documentary proof. It materially exceeds the adjuster's initial BI reserve of EUR 335,000.
